

WE'RE COMMITTED TO MINIMIZING OUR ENVIRONMENTAL IMPACT.

Built responsibly and designed to last.

Beyond a tradition of crafting quality furnishings that are built to last for generations to come, we're committed to minimizing our environmental impact.

Seat Cushions:

Renewable, soy-based polyol replaces 20% of petroleum-based products.

Arm Padding, Seat Deck, Trim Padding:

80% regenerated fibers.

Frame:

Frame suppliers are registered with the Sustainable Forestry Initiative.

Springs:

60% recycled metal.

We manufacture responsibly. We believe in responsible sourcing of raw materials, energy efficiency, waste reduction, and care of air and water resources. It is our aim to increase our use of renewable materials and ensure we source our materials in a sustainable manner.

- We use EPA-approved, HAPS-compliant chemicals – free from harmful air pollutants – in our treatments, finishes and binding agents.
- We meet and exceed regulatory standards for safe emissions.
- 100% American made, reduces transportation carbon footprint.

We recycle, repurpose and reuse – throughout our facility. We identify and minimize waste – recycling everything from the paper and cardboard we use in our office to wood scraps on our manufacturing floor.

We conserve energy. We aim to have our equipment running in the most energy-efficient way possible. Our daily efforts to conserve resources continue to make a difference every day.
