LifeGuard
GREEN PERFORMANCE

Our Lifeguard Green Performance treatment is C-Zero based, which is a fluorine-free performance fabric treatment used to add water repellency and stain resistance to upholstery textiles without the use of PFAS ("forever chemicals"). It's part of the newer generation of clean-chemistry textile finishes designed for residential, hospitality, and commercial furniture.

C0 removes the harmful long-chain chemicals used in C8 and C6 treatments, delivering protection with far fewer environmental and health risks.

Unique Properties

Enhanced abrasion performance

Enhanced soil and stain repellency

Antimicrobial and antibacterial resistance

Water repellent

Does not alter fabric hand or fabric color

Excellent wash durability

Easily cleaned with light brushing, warm water + mild soap

No added formaldehyde

No flame retardants

No PFOS's, PFOA's, or PFC's

Very low VOC's

Cleaning Instructions

Because dust and dirt cause fabric to wear faster, we recommend vacuuming regularly with an upholstery attachment.

Flip, rotate and fluff removable cushions regularly to ensure even wear and increase longevity.

Maintenance requires promptly treating spots and stains and should include routine, on-going care which reduces oil build-up on a fabric's surface.

Do not rub or brush excessively or you may cause fuzzing.

Spot Cleaning *with* Soap + Water

This method can be used for most light to medium stains.

1. Before spot cleaning, blot up liquids on the surface with a clean, soft towel and brush off any loose dirt.

2. Prepare a cleaning solution of 1/4 tsp mild, enzyme detergent, such as standard dishwashing liquid, per 1 cup of lukewarm water.

3. Apply the cleaning solution using a misting spray bottle.

4. Work the solution into the affected area by lightly scrubbing the area with a sponge or soft bristle brush. Make sure to work from the outside of the stain inward so as not to spread the stain and rinse your sponge or brush frequently.

5. Allow cleaning solution to soak into the fabric.

6. Rinse thoroughly to remove all soap residues, as residues will attract dirt. Blot excess moisture with a clean, soft towel or sponge.

7. Repeat steps 3-6 as needed.

8. Allow fabric to air dry.

For Tougher Stains

Use a fabric-safe upholstery cleaner labeled for water-based cleaning.

Spot test first to ensure colorfastness.

Never Use

Bleach.

Solvents or harsh chemicals.

Abrasive brushes - can weaken the fibers or affect finish.
